

### Brookes Bell Hong Kong Seminar:

# Current Contamination Cases

Discussing fascinating case studies and personal technical experiences, our multi-disciplinary team of experts will present some current contamination cases and demystify how modern technology reviews evidence.

**Analysis Paralysis?** By Tim Moss, Luigi Petrone and Karwei So  
Our HK science team will help you understand how common scientific techniques work and how they can be used in various marine investigations.

**Tanker Tribulations – Contamination of Liquid Cargoes** By Ivan Todorov  
Our Singapore-based tanker master Captain Todorov will discuss some interesting cases in which liquid cargo had become contaminated.

**Sample Relevance – Dispute of Bunker Quality** By Mike Liu  
Our Singapore-based fuel chemist Mike Liu will explain how in the bunker business not all can be as it seems and how analysis can separate fact from fiction.

NOV 2019
